

S/N	PRODUCT CODE	DESCRIPTION	BENEFITS	APPLICATION	COLOUR
1.	Lithium MP Grease No.2	Norchem MP is a Lithium-Based NLGI 2 grease. It serves all of the areas where extreme in temperature and corrosion are not critical. Also available in NLGI 1.	<ul style="list-style-type: none"> • Contains heat-stable, anti-wear and antioxidant additives. • Excellent structural stability. • Good resistance to water washout • Lead, chlorine and nitrite free • Great pumpability for easy use. 	<ul style="list-style-type: none"> • Wheel, plain and anti-friction bearings. • Universal ball joints. • Pumps, screws, shears, presses, etc. • All mobile equipment operating under moderate conditions. 	
2.	Multilube EP Greases	Norchem EP Greases are Lithium-12 Hydroxy stearate-based grease with extreme pressure, anti-wear and shear stability. Specially suitable for vigorous and heavy-duty applications. Operating temperature range of - 20°C to + 120°C. Also available in NLGI 1, 2 and 3.	<ul style="list-style-type: none"> • Superior lubrication under severe conditions. • Stays in place in extreme environments to protect equipment. • Suitable for low and high temperature applications. • Protection against rust and corrosion. • Extend bearing life in wet conditions. • Lead, chlorine and nitrite free. 	<ul style="list-style-type: none"> • Recommended where high or shock loads are present or where vibration is a problem. • Anti-friction and plain bearings. • Pumps, brushings, motors, joints, rollers. • All industrial, automotive and marine applications. 	
3.	750 Lithium Complex EP Grease	Norchem 750 is a lithium complex NLGI 2 grease containing highly refined base oils and additives to meet severe requirements of equipment and machinery. Product is smooth, somewhat tacky and slightly stringy.	<ul style="list-style-type: none"> • Excellent lubricity and good resistance to abrasion and extreme pressure. • Good anti-wear and anti-rust properties. • Resists thinning or hardening in bearings, minimizing leakage and maintaining extended life service. • Wide temperature range of - 20°C to + 180°C. • Superior water resistance. 	<ul style="list-style-type: none"> • Recommended for use on all types of bearings. • Universal joints, chassis, fifth wheels, disc brakes and other applications. • Use as a heavy-duty grease in automotive, trucks, buses, farm and marine equipment. • Robust grease for a wide range of marine and industrial applications. 	

4.	WG 758 Wire Rope Grease	Norchem WG 758 is a mineral lithium soap grease. Product contains good refined oil, thickener, adhesion and wetting agents.	<ul style="list-style-type: none"> • Possess excellent adhesion and lubricating properties. • Protects against the corrosion effect of salt or fresh water. Excellent mechanical and oxidation stability (- 20°C to + 120°C) 	<ul style="list-style-type: none"> • All types of new or old wire ropes. • Anchor chains, open gears, moist cables, lifeboat davits, etc. • Fittings, shackles, wheel axles. • As a general-purpose grease. 	
5.	OGL 759 Wire Rope & Open Gear Lubricant	Norchem OGL 759 is a lithium soap thickened gear and wire rope lubricant. Contains various refined petroleum additives rather than asphalt to ensure excellent oxidation and anti-rust resistance.	<ul style="list-style-type: none"> • Highly tacky and adhesive. • Excellent lubrication under heavy loaded gears and wire ropes. • Good penetration into strands and core of wire ropes. • Superior protection against water contact. 	<ul style="list-style-type: none"> • All types of wire ropes and open gears operating under slow speeds. • Cables, derricks and anchor chains. • Recommended for application of railways, locomotive friction motor gear. 	
6.	761 HD Wire & Open Gear Grease	Norchem 761 is a premium grade environmentally friendly calcium sulfonate heavy-duty wire and open gear grease. Product contains a variety of additives such as thickener, adhesive agent and corrosion inhibitors.	<ul style="list-style-type: none"> • Designed to be used in harsh and wet environments. • Protects against the corrosion effect of either salt or fresh water. • Excellent adhesion and super tacky. • Extraordinary performer at high and low temperature. • Lengthens service life of wire ropes, open gears and equipment. 	<ul style="list-style-type: none"> • Lubrication and protection of all kinds of wire ropes, open gears, anchor chains, etc. • Long-term protection of metal cables against rust and corrosion. • As a heavy-duty grease for the marine, offshore, refineries and other industrial applications. 	
7.	762 Calcium Sulfonate HD Grease	Norchem 762 is a premium grade environmentally friendly heavy-duty grease manufactured from highly refined mineral oils with the combination of EP/AW additives.	<ul style="list-style-type: none"> • Excellent performance under heavy load. • Superior protection under both shock loading and running conditions. Wide operating temperature range - 20°C to + 180°C. • Super tacky and does not drip out under running conditions. 	<ul style="list-style-type: none"> • Recommended for marine, loggings and oilfield applications. • All types of bearings and equipment. • As a heavy-duty multipurpose grease.
