FEATURES AND BENEFITS: Filled with 100% meltblown polypropylene for high adsorption. Open net allows for quicker and easier penetration of oil. Can even be used on thicker oils. No inner sleeve allows for better saturation of boom. Available in two diameters as well as two lengths allowing for more flexibility. Can be connected one to the other in order to cover larger areas. Booms continue to float even when saturated. Adsorbs petroleum based liquids and repels water. Ideal for use during clean-up of oil spills on water.
