

The Right Type of Wipe for Every Job

Scana industrial & hygiene paper products are specially tailor-made to meet the most demanding requirements of a wide variety of applications. They are made from environmentally friendly polypropylene, recycled pulp, pure pulp, or a mixture of those basic materials.

Today, hygiene has become a more relevant issue to businesses with the knowledge that a clean working environment is conducive to increased worker productivity. With the paper wipers branch of the business expanding rapidly, Scana has increased its product mix with a new range of hygiene products.

Imported from large paper mills in Europe, these products are universally suitable for everything from the dining table to the kitchen or washroom. Scana high-quality hygiene products are available in various dimensions and consist of centrefeed handtowel rolls, industrial rolls, couch rolls, jumbo toilet rolls and kitchen rolls.

Industrial & Specialty

Service and Hygiene

Scana Purawipe Handtowel

These 1 ply pure cellulose wiping rolls are used generally for hand cleaning, absorption of oil and wiping of grease and dirt. Due to its low lint, good wet strength and high absorbency, it is an excellent substitute for wiping cloth and rags.
